

HORSE PRODUCTS

PRODUCT BROCHURE

Welcome from the Equimins Team

We are delighted to present our latest brochure to you which we hope you will find useful.

Once again, we have updated the packaging on many of the products to give them more shelf appeal, and there are also a number of new products included.

We continue to innovate new products to meet the requirements of the modern competing horse, and always welcome new ideas from our customers.

Once again, may we say a big thank you to all our customers for your continued support.

Best regards

David Willey
Managing Director, Equimins Ltd

It's a Revolution in Horse Nutrition!

(See page 34)

"I withdrew nearly all her hard food and she gained weight quite quickly."

RITA DUNN

"Over the last few months I've been using a combination of your Cooked Linseed and Advance Concentrate (Complete) along with his usual feeds. I can hand on heart say he is looking the best he has EVER looked!!"

SOPHIE AND BOLD MOVE

Some useful bedtime reading about the Horse

Horses have evolved over many thousands of years, and their digestive system is unique. The whole digestive tract, from lips to bum, play a part:

- The lips of a horse are very sensitive and surprisingly dexterous, allowing them to select or reject elements of its feed, and palatability is important.
- Once selected, the mouth plays an important roll in chewing up (masticating) the food. Unlike humans, horses do not salivate in anticipation of a meal, it is the chewing action that produces large quantities of alkaline saliva, and the more they chew, the more saliva they produce. (typically 15 litres per day on a mixed ration). The saliva is important for two reasons. Firstly it lubricates the food, allowing it to pass to the stomach. Secondly, and more importantly, it helps neutralise the acid in the front part of the stomach. It takes a horse 3500 to 4500 chews to consume 1kg of hay. It takes only 850 chews to consume the same weight of cereal.
- Horses are also very prone to boredom, which is distressing for them, resulting in increased stomach acid production, and behaviour problems. This is particularly the case when horses are stabled over winter. It takes the average horse 8 hours to eat 12kg of hay. They would consume a 1.5kg ration of hard food in 15 minutes.
- The stomach has two areas. The ph of the frontal zone is kept higher by the saliva, and allows bacterial fermentation to begin. They are mainly lacto bacteria that breakdown any sugars or starch in the feed. The horses digestive system is not designed to process cereals, they do not deal well with starch, and it is a real problem for them. The greater the starch content of the feed, the greater the problems. The starch content of hay is 1-3%. The starch content of bagged feeds is typically 15-20% for leisure mixes and up to 40% for competition mixes. Check out the bags in store for yourself, but here's an example. A well known company recommend that an average horse eats 3kg of their popular Cool Mix per day. That equates to 600g a day of starch, which = 18kg of pure

starch per month. The starch is broken down by the bacteria, producing volatile fatty acids (VFA). The VFA's are absorbed by cells lining the front part of the stomach, which can then swell, die and finally ulcerate. From the front portion of the stomach, the food moves to the rear area, which is very acidic and it is further broken down in preparation for entering the small intestine

- The small intestine is where digestion and absorption really begins. To do so effectively, the acidity of the food entering it has to be neutralised to allow the good bacteria to thrive. Because a horse is adapted to trickle feeding over many hours, it has evolved without a gall bladder. Bagged feeds tend to be fed in two large portions, morning and night. This means that it cannot be digested properly, particularly our old friend starch, which passes more quickly into the hind gut, where it causes further problems. To try and compensate for this, the gut draws fluid from the blood. Blood plasma levels have been shown to drop by between 15-24% in ponies fed on cereal based feeds one hour after eating, causing a form of dehydration. This is not seen in horses fed on a hay based diet.
- The large intestine is essentially a delicately balanced fermentation vat designed to extract the goodness from a forage based diet. As mentioned, large grain meals overwhelm the digestive capacity of the stomach and small intestine leading to rapid fermentation of starch in the hind gut, which brings about a decrease in the PH. This can cause a serious chain of events including an increase in harmful bacteria at the expense of good bacteria. The net effect of the two large meals, high in starch, can be a release of entoxins and damage to the lining of the hind gut. This in turn, allows the absorption of toxins, and various other pathogens, with potential clinical consequences, including colic, diarrhoea and laminitis.

- I take it we all know what the bum does? Except that even here, the effects of bagged cereal based feeds can be seen, giving rise to more frequent loose stools, that carry with them a greater proportion of the vits and mins that would be retained by a horse fed on fibre. Whatever way you look at it, the best way of feeding a horse is to mimic what it was designed to do, i.e. roam over hundreds of acres, trickle grazing a variety of grasses, herbs from the hedgerows and licking a little soil to gain its minerals. These days, horses are restricted to small paddocks, with very little natural variety. That is why we recommend that hay (or forage) should always be available to the horse, so it can trickle feed as nature intended. To compensate for the relatively low diversity of the pasture, we add Advance Concentrate Complete or Pro-Bio (depending on how much work the horse is doing). Both will supply an excellent range of vitamins and very bio-available minerals, along with pre and pro-biotics and a particular strain of saccharomyces cerevisiae yeast for fibre digestion in the hind gut. Should the horse be in a lot of work, and require more calories, we would recommend adding oil to its diet, (as it is 2.5 X the calorific value of cereal), in the form of either our micronised cooked linseed, which has the advantage of having all the plant fibre as well as the oil, or Equimins Glow and Shine Omega Oil.

CALMING

➔ Horses and ponies can be shy or nervous about things for a variety of reasons, and it is not always possible to identify them. This means that solving the problem is often a case of trial and error. However, research over the years has shown us that a number of things can help in many cases:

For example, we did a lot of investigative work on horses sweat to determine what they lose in body fluids. We found that they mostly lose magnesium. The problem then is to replace this magnesium in a form that a horse can digest properly. Many sources of magnesium such as calcined magnesite, magnesium sulphate and magnesium chloride are fine for cattle that have four stomachs to break it down but a horse has only one! Consequently, **Serenity Ultra Calm+**, our main calming supplement, is based on two sources of magnesium that are particularly digestible for a single stomached animal like a horse. This magnesium, we discovered, when combined with other amino acids, B vitamins and some herbs worked very well at calming most horses. A very digestible form of Calcium is now included in this already excellent product, working very well with other active ingredients to combat excitability without causing lethargy.

Serenity Ultra Calm+

A supplement to help induce calmness and tranquility. After extensive trials with this product, we are delighted with the results. A very digestible form of Calcium is now included in this already excellent product, working very well with other active ingredients to combat excitability without causing lethargy. Serenity Ultra Calm+ has a very high specification, very available sources of magnesium which are now well proven to have a considerable calming influence on horses. Ordinary Magnesium oxide or sulphate is not good enough. It also now includes a very digestible form of Calcium.

We have included Magnesium Fumarate and Magnesium bound to a protein, making it very available. Together with important amino acids and B vitamins, this is a calmer without valerian which is now not allowed in competition.

- Available in 1kg, 1.5kg & 3kg tubs
- A 1kg tub will last 40 days, 1.5kg for 60 days and a 3kg for 120 days.

Serenity Calm Down Paste

A pre-event calming paste to help induce calmness, without making your horse lethargic. To be administered two hours before competing.

- Available in 15ml syringe (1 serving) and 30ml syringe (2 servings)

Serenity and Temperamental were recommended to me and we have proven results in calming horses.

T. SMYTH – BERKSHIRE

I found the Serenity Calm Down Paste excellent for a spooky dressage horse.

S. BARON – BERKSHIRE

We also produce an oral syringe version called **Serenity Calm Down Paste**, which is designed to be a quicker fix for horses and ponies that are a bit spooky before competing. It can be administered about two hours before, to take that edge off the horse without making it lethargic.

Another reason for horses and ponies being nervous is a nervous rider, as the vibes from the rider are transmitted to the horse. For this situation we have two products, **Serenity Rider Chill Out Capsules** and **Serenity Horse & Rider Calming Fluid**.

Many customers, who prefer a completely herbal answer to the problem of nervous horses, have successfully used our **Tranquility Dried Herb Mixture** and **Tranquility Liquid Tincture** to solve the problem.

Finally, it is very important to distinguish between a general spookiness and a hormonal nervousness caused by a mares monthly cycle. **Nightmare Liquid**, a total blend of important herbs, should be used for the duration of the cycle. Alternatively, **Nightmare** is a very comprehensive supplement, helping to combat mood swings not only in mares, but in stallions and rigs as well.

Having tried your Serenity (Ultra Calm) Plus I found it very good. I have a Welsh C Mare which is a ride, drive 13h, 5yrs gets very stressed when in on her own and out on a hack but this product made a huge difference, a lot more settled and easier to train. I work in a saddlery and will be recommending it to our customers.

PAM BROWN

Serenity Liquid Calmer

This is a liquid version based on some additional herbal extracts, but also with many of the ingredients in the powder. Including our exclusive source of magnesium which is so easily and readily digested by a horse, unlike many other sources of magnesium.

- Packed in 1 litre, 2.5 litre and 5 litre bottles
- Feed up to 40ml per day
- 1 litre will last 25–30 days

Magnesium Calmer

A specially formulated blend of digestible sources of magnesium, herbal compounds and B vitamins to gently induce a calm and controlled attitude in horses.

- 1–1.5 measures per day.
- A level measure holds 25 grams.
- A 1kg tub will last 40 days at one measure per day.
- Available in 1kg, 3kg tubs and 15kg bag

Magnesium Calmer. Our first horse has been transformed with Equimins products, we now have a second horse and want her to have the best too.

D. COX, ILKESTON.

Nightmare

HORMONAL SUPPLEMENT

A soothing supplement for mares with PMS and Hormonal imbalance. Helps to combat mood swings when even the most good natured mare can become a NIGHTMARE!!

This supplement has been extensively researched using natural products to help remedy these problems. Nightmare contains a very comprehensive array of natural herbs, magnesium, trace elements, minerals, glutathione and other antioxidants

- Available in 750g, 1.5kg and 3kg tubs

Serenity Rider Chill Out Calmer Capsules

If the rider shows any signs of tension, it will very likely be transmitted to the horse, so a few capsules taken an hour or two before any activity will help the rider to remain perfectly cool and calm.

- Available in 100 capsule tub

Serenity Riders Calmer capsules were recommended by a friend and we tried them with success!

H. THURGOOD – REDHILL

Serenity Riders Calming Capsules that work!

T. STEWART – SCOTLAND

Also ideal for Rigs and Stallions

Nightmare Liquid Tincture

A pure herbal multiblend liquid compound to help maintain a balanced hormonal system in horses. With Vitex Agnus-Castus (Chaste Tree Berry/Monks Pepper), Dandelion, Raspberry, Chamomile, Skullcap, Passion Flower, L-Tryptophan, Magnesium. Average daily feed rate: 15ml per day.

- Available in 1 litre dispenser bottles
- 1 litre will last 66 days

Tranquility Herbs

A blend of eight different herbs all noted for their properties in respect of calming. With Valerian, Vervain, Golden Rod, Raspberry, Chamomile, Skull Cap, Lemon Balm and St. Johns Wort.

- Available in 1kg tubs, 1kg Ecopack and 5kg bag
- 1kg will last 3–6 weeks depending on size of horse

Tried Chill Out Calmer capsules after seeing them in Horse and Hound, they have a good reputation.

D. BUTCHER, DUNFERMLINE

www.equimins.com

DIGESTION

➔ Making sure your horse has a natural feeding regime will go a long way towards ensuring a healthy gut (see **Advance Concentrate Complete**, page 34). However, there are always occasions when a little help is needed.

Colease is a liquid anti-flatulent formulation that will quickly disperse the build-up of gas and will help maintain a normal acid level in the digestive system. It also greatly assists the passage of food through the gut. **Colease** lasts a long time once opened, making it an easy and essential item to keep in the first aid cupboard. 20ml either by oral syringe or added to a small amount of chaff given per day will help horses.

If you are in a sandy area and your horse ingests sand then **Sand-Ex** pellets is the product for you. This is pelleted Psyllium that turns to jelly in the gut and picks up the sand and takes it out with it. The advantage of a pelleted product is that the product is swallowed and turns to jelly actually in the gut. Ordinary Psyllium very quickly turns to jelly in the horse's mouth which they don't like and spit out.

A horse is a very simple single stomached fibre-eating animal. We actually should let them have access to as much fibre as they want to eat, as the gut needs it to work properly. It is usually when we add too much hard feed that the problems start. This is because a lot of hard feeds are starch based and it would not naturally be found in their diet. We have learned over the years that horses will benefit greatly from some help in digesting a lot of fibre and adding something we call **Fibre Digester** daily to the feed does this. It is a particular strain of saccharomyces cervisiae yeast that greatly helps the digestion of fibre, particularly in the hindgut.

Inner Balance Probiotics will help digestion too, and the prebiotics in it will help to colonise the gut wall. **Inner Balance Probiotics** contain two important strains of friendly flora that will help support the immune system. It is particularly useful at times of stress, post antibiotic treatments or when a quick "pick me up" is required. If your horse is travelling and apt to get stressed or stomach upsets then there is an oral syringe version of **Inner Balance Probiotics** called **Probiotic Traveller** which is easy to carry in your pocket and administer just before you travel.

Activated Charcoal

A vegetable form of carbon made from ground coconut shells, it will help clear flatulence, calm and cleanse your horses digestive system and create a comfortable tummy. A periodic supplement not to be fed long term.

■ Available in a 1kg Ecopack.

Fibre Digester

SACCHAROMYCES CERVISIAE YEAST

Fibre Digester is used to stabilise conditions in the digestive system and greatly improve fibre digestion. It contains one billion cfu/saccharomyces cervisiae.

This product has a very much higher level of active ingredients than other yeast products and consequently is very economical to use.

■ Available in 1kg tubs or larger if required

Inner Balance Probiotics

This palatable supplement for horses and foals may be added to drinking water or sprinkled onto feed. Containing the important strains lactobacillus acidophilus and bifidobacterium, together with prebiotic to feed these friendly flora, it is highly recommended for use as a quick pick-me-up and at times of stress.

■ Available in 700g, 1.5kg and 3kg tubs
■ 1.5kg will last 93 days

Gastro Shield

A comprehensive supplement to maintain gut wall integrity.

Six different herbs, Slippery Elm (Ulmus Rubra), Plantain (Filipendula Ulmaria), Marshmallow (Althaea Officinalis), Meadowsweet (Plantago Major), Marigold (Calendula Officinalis), Chamomile (Matricaria Recutita) to help support and soothe the digestive tract. It has a particularly special effect in the nutritional support of the gut wall. The specially selected ingredients used are very effective natural herbal ingredients for the cell wall mucosa.

Contains no banned substances under Jockey Club and FEI rules.

■ Available in 2kg and 5kg tubs.
■ 2kg will last 30 days including loading, 44 days at maintenance.
■ 5kg will last 75 days including loading, 110 days at maintenance.

Mint

Aromatic mint encourages horses to eat. It has been used for centuries as a digestive aid.

■ Available in 500g, 1kg tubs and 5kg bags

Probiotic Traveller

CONCENTRATED PROBIOTICS

Complex probiotic microbial cultures. This highly concentrated paste will provide fast acting support of the intestinal balance. For use when an immediate response is required.

Contents: Fructo – oligosaccharides, Mannan oligosaccharides & Beta Glucans, Lactobacillus Acidophilus, Bifidobacterium Bifido, Saccharomyces Cervisiae, Citric acid, Fruit pectin.

Directions for use:
FOALS – 20 ml per day for three consecutive days.
HORSES – 30 ml per day for two consecutive days

Guaranteed analysis of probiotics per 60ml:

- Saccharomyces Cervisiae 6 x 10⁹cfu (colony forming units) (6 billion)
- Lactobacillus Acidophilus 90 x 10⁹cfu (90 billion)
- Bifidobacterium Bifido 30 x 10⁹cfu (30 billion)

■ Available in 60 ml oral syringe

Pro-Bio Supplement

A broad spectrum vitamin and mineral supplement with generous levels of probiotics to help ensure a healthy and effective gut.

■ Available in 1.5kg and 3kg tubs
■ 1.5kg will last 50 days

Pro-Bio - Fantastic product.

E. MCEWAN, KILWINNING.

Gut friendly

Sand-Ex

Sand-Ex is an all natural dietary pelleted fibre product, Psyllium (Plantago ovata) combined with probiotics and prebiotics. For use when sand is in the intestinal canal, as a natural fibre and microbial supplement to greatly assist the natural flow of food through the intestinal tract.

■ Packed in 1.5kg, 3kg, 5kg and 10kg tubs

Untye

This is a comprehensive supplement to help support horses that experience muscular problems when engaging in strenuous activity. Untye supports mobility and endurance. It contains important ingredients to support the horse's own natural mechanism to optimise blood circulation. Muscles can become softer and smoother and the horse becomes more alert.

■ Available in 1kg tubs

T BALDING OF ANDOVER USES SAND-EX AND PRO-BIO AND SAYS
I love Equimins products, I've been using them for years.

J. MILLING OF BUXTON USES PRO-BIO AND SAYS
Economical and produces contented horses and ponies with super shining coats.

Sand-Ex pellets were recommended by a friend.

E WIGGINS—SURREY

FIRST AID & STABLE

Skin abrasions from barbed wire, cuts from kicks by other horses and irritations. Lots of everyday happenings result in some sort of minor cuts and bruises. Here are some things to keep in your first aid cupboard.

For minor cuts, **Wound Powder and Purple Spray** are both excellent for helping to stop infection and help prevent bleeding. **Total Care Wound Gel** is unique in containing active Silver Ions that are 99.9% effective against gram positive and negative bacteria, helping to keep the wound sterile and hydrated.

Arnica & Witch Hazel (with MSM and Allantoin) is a great soothing gel for bruises particularly, but also for muscle soreness. It helps to maintain the local blood supply and can aid natural recovery. The allantoin content is a protein that helps cell renewal and is good for rough and damaged skin, whilst the **Witch Hazel** is a very useful herb as an astringent.

MSM Cream can also be used to encourage new hair growth on a previous injury and also as protection against mud. A very useful barrier in muddy conditions.

Aloe Vera Gel has a long history as a skin lotion and is used for untold different situations.

Lice and Mite are another problem encountered by horses, particularly in the lower legs if there is extensive feathering.

Lice and Mite Lotion has been developed by vets to very effectively control lice and mite in horses. It should be applied using rubber gloves if you are allergic to anything. Rub well into affected areas twice daily for seven days. **Lice and Mite Spray** is our herbal answer to this problem if you prefer a more natural way of dealing with them. It is a powerful herbal tincture using herbs that are proven to eliminate lice and mite from the coat. It should be sprayed on to the affected areas twice daily for seven days.

Aloe Vera Gel

A soothing gel. Aloe Vera has a long history as a skin lotion. It can aid natural recovery from minor grazes and sunburn. This gel is useful for almost any skin irritation that needs soothing and astringing.

■ Available in 250g and 500g jars

Arnica & Witch Hazel with MSM & Allantoin

A soothing gel for bruises and muscle soreness. Not to be administered internally, applied to broken skin, cuts or sores. Arnica helps to maintain the local blood supply and so supports natural recovery.

Witch Hazel is a very useful herb for tender skin. MSM has excellent properties for skin recovery and Allantoin is a protein that promotes cell renewal, and is good for rough and damaged skin.

■ Packed in 250g and 500g tubs

Arnica & Witch Hazel: I just wanted to congratulate you on a fantastic range of products, in fact I don't know what I would do without Equimins products.

M. TOPLASS, ALFRETON

Colease

A liquid antitflatulent formulation to support the passage of food through the gut without blockages.

■ Packed in 1 litre bottles
■ 1 litre will last 30-50 days

Colease - Pony with poor digestion. Found your cards very helpful in local tackshop.

S. TWIGGER, BEDWORTH.

Colease is a good product.

M. DOWELL - WORCS

Colease actually does work!

J. HURN - CAMBS

Dee-Tye & Drink

For the nutritional support of healthy muscle function.

Contains minerals, body salts, D-alpha Tocopherol acetate (source of vitamin E), selenium, citric acid in a cherry flavoured liquid base.

This supplement will encourage your horse to drink more, essential to help avoid the stiffening up of muscles which can compromise peak performance.

■ Available in 1 litre, 2.5 and 5 litre bottles

Essential first aid, no stable should be without it

A friend has used Colease before on a mare and found it to work very well.

P. BUDD - NORFOLK

Leg Gel

Ideal for use after training or exercise. Contains Camphor, Menthol and Allantoin to gently soothe the skin.

■ Available in 500g and 1kg tubs

Legs R Cool

For use after strenuous exercise to cool, soothe and tighten hot tired legs. A topical clay poultice for application to knees, shins, fetlocks, tendons and ankles after training.

Contents: Kaolin, Water, Aloe Vera Concentrate, Witch Hazel, Allantoin, Menthol, Glycerine.

■ Available in 3.5kg and 7kg tubs

Lice & Mite Lotion

This lotion is easy to apply from the dispenser bottle (using rubber gloves if you have any allergies). It is applied to the lower leg in cases of feather mite or lice. Rub well into clean feathers daily for 5-7 days and leave to dry on.

■ Supplied in 500ml dispenser bottle

Lice & Mite Spray

This product has been proved to be very effective. It contains only natural plant extracts and does not contain any harmful chemicals.

Equimins Lice and Mite Spray should be sprayed on to your hands (using rubber gloves if you have any allergies) and then rubbed in well. Apply twice daily for 5-7 days.

■ Available in 500ml trigger bottles

MSM Cream

A soothing anti-bacterial cream, combining all the benefits of MSM, Aloe Vera, Zinc, Castor Oil and essential oils of Tea Tree, Lavender, Chamomile and Jojoba to help soothe.

A particularly useful barrier in muddy conditions and also to aid the re-growth of hair.

■ Available in 250g, 500g and 1kg tubs

I have achieved success with the Lice and Mite Lotion.

A. KEATLEY - WORCS.

Lice and Mite Lotion is an excellent product.

S. WATTS - ESSEX

www.equimins.com

FIRST AID & STABLE

★ FEATURE MUD

Mud Block Lotion is very effective in controlling bacteria from mud. We have used silver ions, which are positively charged silver particles. They act as a microbial agent killing 99.9% of germs. This lotion is also much easier to apply and rub in to extensively feathered legs than a cream.

Mud Slide Lotion is a tried and tested preparation

of pig oil saturated with sulphur. The oil acts as a very effective barrier, whilst the sulphur is very effective. As well as a lotion to go on the skin, nourishing from within is also vitally important.

Mud Block Supplement has been specifically developed to do just that, helping to improve and maintain skin integrity in wet or muddy conditions.

Mud Block Supplement

A high spec formulation of particular minerals, essential oils, dried herbs and roots to support and nourish the skin from within in wet or muddy conditions. For maximum effect, use in conjunction with Mud Block Cream, Lotion, or Mud Slide.

■ Available in 600g, 1.2kg and 2.8kg tubs

Mud Block Cream

Mud Block Cream is for application to the lower part of the leg. Can be easily washed off at night and re-applied each day. Contains a bactericide, with Aloe Vera, Zinc, Castor Oil & Tea Tree Oil.

■ Packed in 500g and 1kg tubs. Larger sizes available

Mud block is the best.

H. LEWIS, COVENTRY.

Mud Block Lotion

This product, being a lotion rather than a cream, is much easier to apply to extensively feathered lower legs. This formulation uses silver ions, positively charged silver particles which act as a powerful aid.

■ Packed in 500ml flip top bottles

Mud Slide Lotion

The superb barrier qualities of pig oil with the added benefit of a very effective anti-bactericidal agent Flowers of sulphur to help protect horses in very wet or muddy conditions.

■ Available in 500ml and 1 litre bottles

Mud Slide Lotion. Great products, that always do what they say on the tin and really do work.

N. DE LUCA, CHESHAM.

I love Equimins products.

C.WYNNE – WEST SUSSEX

C. MOORE FORM BARNSELY USES SEVERAL PRODUCTS AND SAYS

I am a regular customer, excellent products.

Microlat Stable Disinfectant

An extremely safe disinfectant produced from essential oils, it is even safe enough to use on minor cuts and bruises, in the proper diluted form. Microlat can be sprayed in the air with a mist sprayer or used conventionally from a bucket. 1 litre will make up to 160 litres of ready to use disinfectant. It can be sprayed into the air space of housing or onto prepared chopped straw, where of course it will kill dust bearing bacteria.

■ Packed in 250ml, 1 litre and 5 litre bottles

Stable Fresh

Smelly stables? Then use Stable Fresh, the new powder stable disinfectant from Equimins. No more ammonia smells, a non harmful long lasting powder disinfectant. Use as often as required, a little goes a long way!

■ Available in 2.5kg Ecopacks, 5kg Tubs, 5kg bag and 10kg Sacks

My pony has a nice fresh smelling stable.

JESSICA HOUSON – SCUNTHORPE

Gut Health

A feel good gut the natural way. This unique, highly concentrated blend of 14 different herbs is extremely effective and proven at controlling gut health naturally."

Use as a 5 day course. Mix daily with feed. Repeat every 3 months. Does not contain any harmful ingredients. Do not give to pregnant mares.

■ Available in a 250ml bottles. Larger sizes available on request.

Purple Spray

A quiet pump spray for minor cuts and grazes containing Methyl Violet, Aloe Vera and Isopropanol.

■ Packed in 250ml spray bottles

www.equimins.com

FIRST AID & STABLE

Udder Cream

A soft easy to apply anti-bacterial cream with Aloe Vera, Zinc, Castor Oil and Tea Tree Oil to gently soothe the skin. Very useful as a barrier in muddy conditions.

- Packed in 500g, 1kg and 2.5kg tubs

Winter Leg Scrub Concentrate

A concentrated cleansing bactericidal & fungicidal leg wash. For use during the winter months to help when mud is a problem. Use at the end of the day when you bring your horse in from the field.

- 500ml bottle – 25 applications
- 1 litre bottle – 50 applications

Wound Powder

For use on minor wounds, saddle sores, bites, cuts and scratches on horses. Wound powder is a blood coagulant and a dressing for use on minor wounds. It is also a useful drying formulation for minor wounds that are slow to repair.

Wound powder may also be used for other livestock as a blood coagulant after tail docking and dehorning.

- Available in 125 g puffer bottle

Total Care Wound Gel

This product is at the forefront of new developments in wound care, using silver ions shown to kill 99% of bacteria. Plus six other active ingredients to help promote healthy skin rejuvenation, after injury. Helps to keep wounds hydrated.

- Available in a 100ml airless dispenser

Wound Gel - Really like Equimins products.

H. WERRY, ULVERSTON.

Tea Tree Mist

For use in cases of minor cuts, bites and the maintenance of healthy skin. Anti-fungal and anti-bacterial.

- Available in 500ml spray bottles, 1 litre trigger spray bottles

Tea Tree Mist. Excellent product for our donkeys hooves.

S. SPURGEON, TAUNTON.

FLY & MIDGE

Keeping your horse healthy and comfortable can be a challenge when the flies and midges are about. That is why we have developed a range of solutions. **Fly Repellent Gel 3535** contains the very effective 15% Ethyl Butylacetylaminopropionate (3535), it really is the ultimate fly repellent. **Fly Repellent** contains essential oils

from six different sources, making it very effective. For those looking for something stronger, **Extra Strength Fly Repellent** was developed for export to those parts of the world where bugs have definitely "gone large". It has a comprehensive formulation to help repel biting flies, midges, mosquitoes and other flying insects.

Biting Midge Cream

A gentle easy to apply cream to repel midges, flying insects, and to soothe itching skin. Contains Tea Tree Oil, Apricot Kernel Oil, Jojoba Oil and Chamomile Oil.

- Available in 350g and 1kg tubs

Fly Repellents

Containing essential oils from six different sources, this is a fly repellent that really works. Occasionally, a horse may be allergic to a particular essential oil, so a small area should always be tried if you are using for the first time.

- Available in trigger sprays and quiet sprays, 250ml, 500ml, 750ml or 1 litre and 5 litre bottles

Fly Repellent Extra Strength

A comprehensive formulation to help repel biting flies, midges, mosquitoes and other flying insects. This product has been outstandingly successful all over the world. We highly recommend it to you

- Packed in 500ml and 750ml trigger bottles. Larger sizes available

Fly Repellent Gel 3535

The ultimate fly repellent. A powerful, no mess, clear gel containing 15% Ethyl Butylacetylaminopropionate (better known as 3535) to help repel biting insects, including flies, midges and mosquitoes.

- Packed in 500g tubs

www.equimins.com

GROOMING

➔ Making your horse look as good as possible makes you and your horse feel great. We have produced a superb range of products to help you achieve that stunning look.

We have several shampoos in the range. For example, we have a medicated one, **Microlat Horse Shampoo**. This product contains microlat, our own very safe and effective disinfectant to remove any bacteria or fungi from the coat.

Next we have **Tea Tree Shampoo** with its characteristic tea tree smell, which deeply cleanses and leaves the coat pristine clean. **Blue Shampoo** will make greys gleam, **Dark Shampoo** for deepest lustre and **Red Shampoo** for chipper chestnuts. Finally we have a wonderfully fragrant **Citronella Shampoo**, which works particularly well in the summer with our **Citronella Summer Spray**.

When it comes to grooming, **Ultra Shine Groomer** adds real shine and lustre to the coat and will help to repel dirt and dust. **Ultra Silky Detangler** lotion is just superb for getting the tangles out of manes and tails, again adding a lustrous shine.

Clean Coat is a natural refreshing body wash, excellent for cooling and the removal of sweat and dirt after exercise. It contains tea tree oil, witch hazel, allantoin for the skin, and a nice fresh spearmint aroma.

Lavender Fresh is a nice pure and natural anti-bacterial lavender wash to refresh horses and help to soothe minor cuts and bruising. It provides a very relaxing experience for a horse after strenuous exercise.

Finally, don't forget about our **Dry Clean Spray**, the waterless body cleanser to effectively remove sweat, grass, stable stains, grease and dirt.

Clean Coat

A natural refreshing body wash, excellent for cooling and the removal of sweat and dirt after exercise. Can also be used undiluted as a pre-clip degreaser.

With Tea Tree Oil, Witch Hazel, Allantoin and a fresh spearmint aroma.

■ Packed in 500ml bottles

I use Clean Coat and Tea Tree Shampoo, good well priced products.

MAXINE EASEY – DERBYSHIRE

I've just posted on Facebook page about Clean Coat Body Wash, its a super wash. Not heavily perfumed, no residue, cools the horse straight away and dries to a mirror shine.

ANN WILLIAMS – SUFFOLK

Dark Shampoo

For black and dark horses. A rich dark shampoo with lavender essential oils and conditioner.

■ Available in 500 ml, 1 litre and 5 litre bottles.

Ultra Silky Detangler

A specialist product developed particularly for detangling manes and tails.

■ Available in 500ml, 750ml and 1 litre trigger spray and 5 litre refill containers

Dry Clean

A waterless, body cleanser to remove sweat, grass, stable stains, dirt and grease. Very useful at shows in the summer to keep your horse looking good after strenuous exercise.

Handy in the winter when you don't want to fully shampoo your horse.

■ Available in 500ml and 1 litre trigger spray

Enhancing Gloss

A clear light gel for highlighting features, providing a superb glossy look. Apply with a small sponge to enhance areas around the eyes and nose, and for adding quarter marks. For maximum effect, do not rub in.

■ Available in 100g jars

Lavender Shampoo

Gentle yet effective. A rich shampoo with natural essential oils of Lavender. It leaves your horse smelling like a breath of spring, and with a super shiny coat. Lavender can also assist in repelling annoying biting insects.

■ Available in 100ml, 500 ml, 1 litre and 5 litre bottles.

Blue Shampoo

A rich shampoo with conditioner which can be used without fear of any staining. Formulated specifically for grey or white coats, but may be used to enhance the colour of any coat, to provide better definition and depth of colour.

■ Available in 100ml, 500ml and 1 litre bottles. Larger sizes available if required

Citronella Shampoo WITH CONDITIONER

A special formula rich shampoo with natural Citronella essential oil. This is a very refreshing and cooling wash for horses through the spring and summer.

■ Available in 500ml, 1 litre and 5 litres.

Citronella Summer Spray

A refreshing summer spray for horses with natural essential oils of citronella.

■ Available in 250 ml, 500ml, 1 litre 2.5 litre and 5 litre

One of the products I have used regularly is your Detangler Lotion. My mare has a huge tail - it draws a lot of compliments but can be a monster to brush. Equimins Detangler is the ONLY product that enables me to keep her tail looking lovely.

ROS SHAW – VERY PLEASED CUSTOMER!

GROOMING

Lavender Fresh Wash

A pure and natural antibacterial lavender wash to refresh horses and help to soothe minor cuts and bruising. Lavender Fresh provides a relaxing experience for horses, particularly after robust exercise.

It contains pure high quality lavender essential oil to soothe and calm, coconut to efficiently remove sweat and dirt. Does not contain soap, thickeners or detergents. Used at the rate of one capful per litre of water.

■ Pack size 500ml and 1 litre

Woulant be without Lavender Fresh Wash.
DEBORAH PINDER – SHEFFIELD

Leg & Body Whitener

A really excellent body and leg whitener to make your horse stand out in the showing. This product can be applied on the day of the show. It may also be mixed to a paste with water, applied to the legs and bandaged up the night before the show.

To use as a body whitener, mix a small cupful in a medium size bucket of lukewarm water and apply all over the body, including mane and tail. Cover with a sheet and allow product to dry into the coat.

■ Available in 1kg tubs. Larger sizes available if required

Microlat Horse Shampoo

This horse shampoo with conditioner contains Microlat, a natural ingredient made with several essential oils will help cleanse the coat of any bacteria or fungi. It may be used quite safely on any animal.

■ Packed in 500ml, 1 litre and 5 litre bottles

Quarter Marker

An excellent solution to set and hold quarter marks in place all day long.

Directions for use: Simply spray the area to be marked and using a comb or brush, apply quarter marks. For added definition, apply one of the Vanity range of glitter gels to the quarter marks and tail.

Note: This product is flammable so should be stored at 25 degrees or lower.

Free from any prohibited substances as defined under Jockey Club and FEI rules.

■ Available in 500 ml trigger sprays.

Red Shampoo

For chestnut horses. A rich red shampoo with lavender essential oils and a conditioner.

■ Available in 100ml, 500ml, 1 litre and 5 litre bottle

Sheath Cleanser

A very gentle natural coconut formula to help soften and clean away sharp smegma from the sheath. Always take great care when applying inside the sheath as this is obviously a very tender area.

■ Supplied in a handy 250ml squeeze bottle

Greasepaint

Make up for horses in Black, Brown and White. A versatile greasepaint to add glamour to eyes. Can be used on nose and muzzle to define depth of colour and to conceal any blemishes. Use sparingly and blend to desired shade.

■ Available in 50g Jars

Stain Remover

A spray on clear lotion to remove stable and grass stains.

■ Available in 500ml trigger spray bottles

Tea Tree Shampoo

A special formula shampoo with conditioner to thoroughly clean the coat.

■ Packed in 500ml, 1 litre and 5 litre bottles

HOOF

➔ It was a vet some years ago who advocated 15mg of biotin per day to keep horses hooves in good order. In our considered opinion, 15mg of **Biotin 15** is sufficient to help maintain healthy feet, but is nowhere near enough if the horse has a problem with bad feet. That is why, in addition to standard **Biotin 15**, which does deliver 15mg per day, we also produce two additional products.

For hooves in need of serious repair, we would recommend **Hoof Mender 75**. It offers much higher levels of biotin than you find in other products, (75mg per day), combined with a very digestible source of zinc. Together, they provide the correct nutrition to encourage good strong keratin growth. It must be stated that hoof nutrition is a long-term process and results cannot be seen quickly. An average horse would receive 60 grams per day, which means that a

3kg tub will last 50 days and a 5kg tub will last 83 days.

If the problem is not quite so serious, then **Biotin Plus 25** is the best product to opt for. It delivers 25mg of biotin per day, making it a superior spec to ordinary biotin. We have many satisfied customers who have successfully used this product over many years.

The hoof is composed of approximately 25% water and to help maintain healthy feet it is important to make sure they do not dry out. Regular moisturising is a very good principle and this can be done with **Hoof Moisturising Cream** or our brush on lotion, **Hoof Moisturising Lotion**. keeping the feet clean is also another good practice This can be done with **Hoof Disinfectant Spray** and **Tea Tree Mist Spray**.

Delivers
15mg/day of Biotin
2kg lasts 80 days

Biotin 15

A supplement for healthy hoof growth, and to improve the condition of coat and skin. With Zinc Methionine, Calcium, MSM and Copper.

- Available in 1kg, 2kg, 3kg and 5kg tubs, 2kg refills, 10kg and 20kg bags
- 2kg will last 66 days

R.MATTHEWS FROM MIDLOTHIAN SAYS:

Biotin Plus is a good product and helps my endurance horse's hooves stay in good condition.

Does what its says on the tin.
MARGARET FERNE - ISLE OF ANGLESEY

Biotin Plus 25

This well established supplement contains higher levels of Biotin, together with organic Zinc methionate. Strong keratin growth is essential for healthy hooves.

Use this supplement when hooves are in a poor condition rather than ordinary Biotin.

- Available in 1kg, 2kg, 3kg and 5kg tubs, 2kg Eco pack and 20kg Bag
- 2 kg will last 66 days

Delivers
25mg/day of Biotin
2kg lasts 66 days

Delivers 75mg
of biotin/day
3kg will last 50 days

Hoof Mender 75

SUPPLEMENT
PELLETS & POWDER

Hoof Mender supplement has brought dramatic results in hoof quality to thousands of horses. There is no other product with the same broad spectrum of important ingredients to encourage keratin growth in the hoof.

Hoof Mender comes with a full money back warranty in the unlikely event that you do not see a significant improvement in hoof quality after using it for a full twelve month period.

- 3kg will last 50 days.

C. NIXON OF CHELMSFORD
USES HOOF MENDER AND SAYS
Good value product that works.

N. CRAIG, WHITLEY BAY USES
HOOF MENDER AND SAYS
Always use it, getting fab results!

Barefoot trimmers recommended Hoof Mender powder to me.
H. WICKHAM - YORKSHIRE

Our horse is doing well on Hoof Mender powder.

A. KAY - CHESHIRE

Have purchased Hoof Mender before, it works!

P. HOWE - DEVON

Last year you offered my local tack shop 'Victorian Saddles' a free supply of 'Hoof Mender' to give to her farrier that he felt a horse could benefit most from. I took the opportunity as I had just the client. He is a typical thoroughbred with no horn growth, poor quality of horn, weak collapsed heels and no bars. I have shod him for three years, carefully removing his shoes so not to damage the weak wall then rasping away any flair before fitting new shoes, just trying to preserve what little wall he had was a task. We started using Hoof Mender in June last year and after six months this horse is growing vast amounts of horn and of superb quality his heels are strong and is developing bars to support them. If I hadn't experienced it myself I would never had believed it, your product works without any doubt at all, and I have several clients using Hoof Mender and will continue to promote it to other farriers alike. Many thanks for the opportunity to trial your product.

LEE ASHWORTH DIP. WCF - ROCHDALE

I've been using Hoofmender for a couple of months now, with much success. This is a fantastic supplement!
CLAIRE COPE - WIRRAL

EQUIMINS

Hoofmender. My barefoot trimmer recommended this supplement for my horse who has shown significant improvement in his feet.

C. MURLEY, WHITLEY BAY.

Hoofmender. The best biotin supplement there is.

Y. WALSH, WREXHAM.

www.equimins.com

HOOF

★ FEATURE PRODUCT LAMINATOR

Laminator supplement has been developed for use with horses that are prone to laminitis. It contains Hesperidin, a bio flavanoid derived from citrus fruit, the herb Feverfew and Vitamin C.

We also include a very bio-available and digestible organic source of zinc to help encourage strong keratin growth. Our unique process ensures that the zinc is in a form that the horse can easily absorb. A particular strain of *saccharomyces cerevisiae* yeast is included in **Laminator** to greatly assist the digestion of fibre in the hindgut. We also include prebiotics to keep the gut healthy. High levels of organic magnesium, manganese and powerful antioxidants, including Vitamin E, are added, together with very high levels of biotin (Vitamin H), Feverfew and Milk Thistle. They are just part of the 35 vitamins, minerals and trace elements included to ensure maximum nutritional support during this difficult time.

Laminator comes in 1.2kg, 2.4kg and 3kg tubs of powder. Pellets are available in 3kg tubs.

A daily amount of 50 grams is given for the average horse, 25–30 grams for the average pony.

A 1.2 kg tub at 25 grams per day will last for 48 days.

Now with
Milk Thistle

Hard & Healthy

Hard & Healthy provides a carefully researched blend of ingredients to help keep hooves in a strong condition, whether for shoeing or going barefoot. It will help to prevent the loss of shoes, thin soles, splits and cracks.

Hoof Moisturising Balm can be applied in between these times to help lock in a fixed moisture level so helping to prevent the hoof becoming too soft in very wet conditions, and similarly, too dry in hot dry weather. An ideal steady moisture level of the hoof is 25%.

■ Available in 400ml bottles with brush attached.

Hoof Disinfectant

A safe and powerful ready to spray hoof disinfectant. This product is produced from a variety of safe bactericidal and fungicidal essential oils, Alpha Pinene, Beta Pinene, Citronell, Geraniol and Cineole, together with a biocide specifically developed for the complete microbiological protection of water based products against bacterial and fungal spoilage in the wet state.

The hoof should be thoroughly cleaned on the underside before using Hoof Disinfectant, particularly manure droppings.

There are other disinfectants that will kill the same things, but are not safe products to use on animals or humans, as they mostly contain aldehydes or glutaraldehydes. These two products are classified as poisonous and therefore not suitable for use with animals. Store at 10–20°C.

■ Available in 500ml trigger bottles

Hoof Moisturising Cream

A simple, easy to apply cream to retain moisture in the hoof and add shine. Helps to prevent cracking and splitting. Apply daily with a hoof brush.

■ Available in 500g tubs

Hoof Moisturising Lotion

A simple, brush on lotion to effectively help retain moisture in the hoof. Helps to prevent cracking and splitting.

■ Available in 400ml bottles with brush and 1 litre refill bottles

Hoof Oil

A specially formulated product to protect against split hooves and other problems. Apply with a hoof brush.

■ Available in 400ml bottles with brush, 500ml, 1 litre, 2.5 litre and 5 litre bottles

Solid Hoof Oil

No mess or waste as this is hoof oil in a solid form, making it much easier to use.

■ Available in 500g and 1kg tubs

Tea Tree Mist

For use in cases of minor cuts, bites and the maintenance of healthy skin. Anti-fungal and anti-bacterial.

■ Available in 500ml spray bottles and 1 litre trigger sprays

Stockholm Tar

THICK PINE TAR

A good old fashioned remedy for hoof care.

■ Packed in 500g and 1kg tubs

*Fantastic product,
I saw a visible
improvement by
day three, I can't
recommend it enough!*

JOINT

The modern horse is very much like the modern athlete. We have more and more expectations of them, and a horse or pony does not necessarily have to be old to have problems

Flexijoint contains high levels of Chondroitin, which provides the components that are the shock absorbers of cartilage. It does this by binding large amounts of water into the cartilage. Another constituent of **Flexijoint** is Glucosamine, which is essentially the building block for lubricants and shock absorbers in the body. Then we include **MSM**, an organic form of sulphur, which is needed for the synthesis of connective tissue. Antioxidant Vitamin C is included too, because it helps to rid the body of free radicals.

For horses in competition **Flexijoint Liquid with Bromelain** is an alternative. Bromelain is a very effective ingredient for the nutritional maintenance of joints, derived from pineapples and is approved for competition rules.

Our sister company makes a human version of **Flexijoint** in capsule form, ask your retailer to get some in for you!

Other joint products in the Equimins range are herbal and include **Mobile Mover Dried Herbal Blend** and **Mobile Mover Liquid**. Oils can also help give some relief to stiff joints and **A & R Cod Liver Oil** has been formulated with precisely this in mind.

Glucosaflex 10,000

JOINT SUPPLEMENT

A joint supplement with 10,000mg of Glucosamine and 2,000mg of MSM per 30 gram serving. With added vitamin C.

Supplies nutritional support for cartilage and tendons. Helps maintain healthy joints.

- 60 days supply at maintenance level (15g)
- Available in 900g and 1.8kg tubs

I have a 30 year old cob which I drive, do a bit of showing and hacking all in the carriage. I was going to retire him after last season as he was getting really stiff, but wintered so well I thought I would squeeze another season out of him. So I started using your Glucosaflex 10,000 about 3 weeks ago, and I have never seen such a difference. He is going so well, I'm so happy!

V. BROWN, WOODBRIDGE.

Inflamm-e-rase

JOINT SUPPLEMENT

For the nutritional maintenance of healthy bones, Joints and ligaments.

It contains Devils Claw root, Bromelain, a derivative of Pineapple, important vitamins, B1, B2, B6 and B12, organic minerals – copper, manganese, zinc, iron, selenium and a vast array of fourteen different herbs, including Boswellia serrata,

yucca, acacia catechu, bay laurel, turmeric, skullcap, nettle, celery, burdock, dandelion, clivers, chamomile, ginkgo, meadowsweet.

Directions for use: Feed two measures daily (20 grams).

- Available in 600g and 1.2kg tubs
- 600 grams will last 30 days

Flexijoint

A powerful supplement to support healthy cartilage, strong joint structure and the quality of synovial fluid. Containing a superb specification of Chondroitin Sulphate, Glucosamine, MSM and Ascorbic Acid.

- Available in 600g, 1kg, 1.5kg, 3kg, 5kg and 10kg tubs
- 600 grams will last up to 60 days

Flexijoint Liquid

All the benefits of Flexijoint powder but in a Devils Claw base to further help soothe stiff joints. With chondroitin sulphate, glucosamine, MSM and ascorbic acid.

- Available in 1 litre, 2.5 litre and 5 litre bottles
- 1 litre will last 50–60 days

Flexijoint. I'm on my first tub and I think it is helping my dartmoor hill pony who has clicking hips.

S. DAVEY – EXETER

Flexijoint Liquid is a fantastic product.

SARA BROOKES – LANCASHIRE

J. WAYMONT OF WICKFORD USES FLEXIJOUNT AND SAYS

I searched the web and read that this was one of the best joint supplements.

Flexijoint Liquid. Good quality products that work.

K. THOMPSON – NUNEATON

Flexijoint Liquid with Bromelain. I know the company name, trust the quality of product.

B. EVANS – AMERSHAM

Flexijoint Liquid. Equimins make fantastic products, value for money, my 29 year old mare (still ridden) is proof of that.

L. LILLEY – BECCLES

Flexijoint Liquid with Bromelain

An equine supplement to maintain healthy cartilage and strong joint structure.

Bromelain is a derivative from pineapples and is an excellent product for the nutritional maintenance of the joints.

It contains very generous levels of Chondroitin, Glucosamine, MSM, Ascorbic acid as a valuable anti oxidant and Bromelain to further help soothe stiff joints. It is a very suitable alternative to the standard Flexijoint Liquid which contains Devils Claw and is now not permitted in competition.

- Available in 1 litre, 2.5 litre and 5 litre bottles
- 1 litre will last 50–60 days

I am thrilled with Flexijoint powder, used on 13 year old ex chaser.

JESSICA REES – EQUINE VET

Flexijoint was recommended by a friend, it has a good reputation and it works!

L. LUMSDEN – CLACKMANANSHIRE

Flexijoint is amazing, my mare was told bute for the rest of her life. Used Flexijoint, came off bute shortly after, and now most of the yard are on Flexijoint.

RACHEL – LULHAM

I have been giving my 13 year old mare two scoops a day and within a week she is a different mare. She is happy and moving like a 3 year old and rode her and asked for collection and she was very willing, not been able to ask for it in four years. Her sore back has gone and the elevation in her hind and front legs is amazing.

KARINA KING – EXETER

My mare diagnosed with navicular has improved so much with Equimins Flexijoint. I used Liquid Gold as well to aid circulation and it is a winning formula. I wish I had taken before and after videos to show the improvement.

JACKIE TAYLOR

www.equimins.com

JOINT

A & R Blend Cod Liver Oil

Rich in Omega 3 polyunsaturated fatty acids EPA and DHA helping to maintain mobility and flexibility, particularly in older horses.

- Packed in 1 litre & 5 litre containers
- 1 litre will last 25–50 days

A&R has made a marked difference to my two aged horses.

JEAN CARTWRIGHT
— CUMBRIA

Devils Claw Root Herbs

Devil's Claw has been a popular herb since it was first discovered in South Africa by European colonists in the 18th century.

Add one slightly heaped measure (15 grams) per day to the feed.

- 1kg will last 66 days.
- Available in 1kg tub and 1kg Ecopack

Devils Claw Gel

An easy to apply gel that is quickly absorbed through the skin. Very cooling and soothing, utilising the properties of Devils Claw to help maintain suppleness and ease of movement. Best used in conjunction with Liquid Devils Claw.

- Available in 250g, 500g and 800g tubs

Devils Claw Liquid

A herb originating in Africa, this is a tincture version, making the qualities of the herb much more available and going straight into the bloodstream. For the nutritional maintenance of healthy bones and joints. To help maintain suppleness and ease of movement. Do not feed to mares in foal.

- Available in 1 litre, 2.5 litre and 5 Litre bottles
- 1 litre will last 50 days

Flexijoint

Do you have stiff or aching joints?

Flexijoint is a superb formulation containing Glucosamine, Chondroitin Sulphate, MSM and Vitamin C all of which are known to help keep joints healthy. Joints rely on cartilage being constantly repaired to stay supple and mobile. Flexijoint will have applications in all walks of life, from young people with athletic injuries, middle-aged who have always been engaged in manual work with aching backs etc., to older people with the associated problems of aging limbs.

- 200 capsules, over two months supply.

MSM

(Methyl Sulphonyl Methane)

A very bio available source of sulphur, particularly important for flexibility of joints. It is essential for helping to maintain agility and soundness in horses of all ages when in a competitive situation. MSM is found in every connective tissue in the body.

- Available in 350g, 1kg and 3kg tubs
- 350g will last 38 days for maintenance levels

www.equimins.com

LEATHER

➔ Keeping your leather work in top condition not only looks good, it makes economic sense too. Our **Leather Spray Soap** offers a convenient way of cleaning more intricate pieces. **Leather Conditioning**

Cream is especially good for rejuvenating older leather, whilst **Pure Neatsfoot Oil** keeps leather soft and supple, whilst protecting it from mildew.

Leather Conditioning Cream

A soft cream to rub into leather to soften and protect. For use on saddles, harness, shoes, bags etc.

■ Available in 250g and 500g tubs
Larger sizes available

Leather Spray Soap

Cleans and treats all leather to keep it pliable and soft. Easy and convenient to use, it will make old and new leather have that rich feel.

■ Packed in 500ml trigger sprays

Glycerine Leather & Saddle Soap

An easy to use solid tub saddle soap. Conditions and protects all leathers. Apply with a warm moist cloth or sponge and rub into leather.

■ Packed in 250g and 500g tubs.
Larger sizes available

Pure Neatsfoot Oil

This is pure neatsfoot oil, not a blend. Although it will remain in liquid form at quite low temperatures, it is best to slightly warm it before use. Neatsfoot oil will keep leather very supple.

■ Packed in 500ml bottles

MARE, FOAL & OLD

➔ Tailoring nutrition at the beginning and end of life is very important. That is why we developed **Young Stock Formula**. It has been specially formulated to meet the rigorous and complicated demands of a growing foal, giving them the best possible start in life.

For older horses, the challenges are somewhat different. They may be slower, perhaps a few teeth missing, so can have problems chewing. As our companions get older it is natural for us to want to do the best we can to give them some real quality of life in their twilight years.

We have a number of very useful products for joints, for details see Joints on page 22.

Good overall nutrition for an older horse can mean the difference of several extra years of healthy life if started early enough. That is why we developed **Veteran Vits & Mins**, with a strong emphasis on the digestion of fibre. We have included high levels of a particular strain of saccharomyces cerevisiae yeast to really help with fibre digestion in the hindgut. This is so important when the horse or pony cannot chew its forage as well as it used to. There are also some very generous levels of probiotics and prebiotics to greatly assist conditions in the early part

of the gut. We have paid particular attention to B vitamins as older horses have a greater need for them. Organically bound minerals that are virtually all easily digestible for a horse are also included. This alone can make a huge difference to top line, muscle and coat condition. We have several testimonials to prove how outstanding this supplement is in helping veterans.

Other products in our range include **Old Horse Liquid**. This is a powerful blend of important herbs in a liquid tincture form that is very easily and quickly absorbed into the blood stream. It is a powerful tonic that we suggest is given for a period of a month, twice a year. It can safely be kept in the first aid cupboard and it will actually get stronger with age!

A short course of **Cleanser** twice a year will also help keep the liver healthy. If your horse is a particularly poor chewer of fibre, then we would recommend **Fibre Digester** to be used in conjunction with **Veteran Vits & Mins**. This is the concentrated version of the special strain of yeast. It will help the digestion of fibre enormously and a 1kg tub will last 100 days.

Dicalcium Phosphate

This is Dicalcium Phosphate Dihydrate, the most widely used feed Phosphate in Europe.

It is an ideal product to use in all kinds of feed because of its high biological value and its Ca/P ratio of 1.3:1. It is very important for young growing horses, and also for older horses and brood mares.

■ Pack size 4kg tub

Young Stock Formula Supplement

This supplement has been thoroughly researched and developed to provide the most advanced nutrition for the modern young growing foal.

■ Packed in 2kg and 4kg tubs

Veteran Vits & Mins

Specifically formulated for the older horse or pony, with particular emphasis on the proper digestion of fibre. Containing high levels of probiotics, Saccharomyces Cerevisiae Yeast and prebiotics to colonise the gut wall and to support the work of the probiotics. This is a powerful supplement to help ensure quality health in old age.

■ Available in 2kg and 5kg tubs, and 2kg Ecopacks

■ 2kg will last 40 days

NUTRITION

Correct nutritional support is fundamental to good health. As horses are so diverse in their requirements, we offer a very wide range of products within this category. They are all produced to the very

highest standards, chosen with care to ensure the highest levels of efficacy. Where appropriate, we also offer many of them in our re-sealable **Ecopacks**, helping to reduce both cost and waste.

Aloe Vera Juice

A high quality blend of whole leaf and unfiltered inner gel Aloe Vera to provide maximum strength.

Aloe Vera is widely acknowledged to have several qualities, both taken internally and applied externally. It can also be used to soothe minor cuts and grazes.

- Packed in 1 litre and 4 litre containers

Cider Apple Vinegar

A pure organic product used as a natural probiotic, also to restore appetite and improve coat condition. Our Cider Apple Vinegar is unpasteurised and complete with the all-important "Mother". This is a gel like substance that contains a great many nutrients and important trace elements. It is not present in inferior products

- Packed in 1 litre, 2.5 litre and 5 litre bottles
- 5 litres will last 100 days

Cleanser

A blend of the following herbs: Milk Thistle, Liquorice, Burdock, Dandelion and Vervain. A cleansing blend for the liver and kidneys.

- Packed in 1 litre dispenser bottles
- Feed 15ml per day

Cod Liver Oil

A natural source of very digestible vitamins A, D3 and E and a source of energy. Helps to promote good health, a shiny coat, bright eyes and stronger teeth, bones and hooves.

- Available in 500ml, 1 litre, 2.5 litre, 4 litre and 5 litre containers
- 1 litre will last 30-50 days.

Cooked Linseed

This is pure micronized ground linseed, a rich source of Omega 3 and Omega 6 oils. The ideal accompaniment to a full spec supplement or a feed balancer and as an alternative to linseed and other oil with the added advantage of all the fibre.

This product will put a wonderful shine on any horse.

- Available in a 3kg Ecopack, 5kg, 10kg and 20kg bags.

What a fantastic shine on my Friesians mare's coat since I started using Equimins Cooked Linseed.

ELAINE SIMPSON - RENFREWSHIRE

Detox

LIQUID HERBAL EXTRACT

Formulated to specifically help detoxify impurity build up, containing Burdock, Liquorice, Dandelion, Nettle and Clivers.

Liquid extracts are very rapidly absorbed in to the blood stream. Feed 15ml per day.

- Packed in 1 litre dispenser bottles

Have used Detox Liquid before, it is good stuff.

P. BUDD - NORFOLK

Echinacea Herbs

Echinacea Angustifolia is used to help maintain a healthy immune system.

- Available in 1kg tub and also 1kg Ecopacks

Liquid Echinacea Angustifolia

Echinacea Angustifolia is used to help maintain a healthy immune system.

- 1 litre bottle
- 1 litre will last 50 days

Epsom Salts

A valuable source of magnesium salts and an essential body electrolyte.

- Available in 1.5kg tubs

Garlic Granules

A matter of preference, some use granules rather than powder as the keeping qualities are a little better, although you should always replace the lid after use.

- Packed in 500g, 900g, 3kg and 5kg tubs. Also available in 1kg and 3kg refill bags, 10kg and 15kg Bags

Garlic Powder

Used traditionally for digestive and respiratory systems. Garlic is the ideal herb to use to support the body's natural defence system.

- Available in 500g, 1kg, 3kg and 5kg tubs, 15kg sack and also 1kg and 3kg refill bags

Glow & Shine Omega Oil

A blend of cold pressed oils all from natural vegetarian sources.

A valuable source of energy and Omega 3, 6 and 9. Oil is a much more digestible nutrient for the supply of energy for horses and is two and half times the calorific value of cereals. A horse is not a natural cereal eater and can digest oil easily. It provides a slow release of energy and is non heating.

High in Omega 3 which has been proven to help maintain joint integrity and is good for the heart. Low in saturated fat. This product is the logical progression to more sustainable sources of Omega 3 than marine oils which are becoming more scarce. It is also a more natural way of feeding a horse than marine oils.

- Available in 2.5 litre and 5 litre containers.

www.equimins.com

NUTRITION

Cold Pressed Linseed Oil

Enhances coat condition and is also a very useful digestive aid.

■ Packed in 500ml, 1 litre, 2.5 litre, 4 litre and 5 litre bottles

■ 1 litre will last between 30–60 days

Limestone Flour

A natural source of Calcium, very important for the healthy growth of bones, teeth and hooves. Particularly necessary for young stock, and to balance diets high in grain.

■ Packed in 3kg tubs

■ 3kg will last up to 150 days

Linseed & Fenugreek

A milled and ready cooked linseed together with fenugreek seeds for general health and well being, and a shiny coat. Linseed is a very useful digestive aid, and Fenugreek seeds are rich in flavanoids, Vitamins A, B1 and C, minerals and 25% protein. Used to encourage weight gain.

■ Available in 3kg tubs

■ 3kg will last 60–100 days

Cushinator

Cushinator has been carefully formulated to provide an extremely comprehensive array of 40 different ingredients. All selected for their various properties in support of Cushings.

■ Available in 1kg and 2kg tubs

Garlic Extract Liquid

CONCENTRATED GARLIC EXTRACT

This product is many times stronger than powder and daily use will support the respiratory system in a way no other single herb does. Garlic will help the digestive tract in the development of natural bacterial flora and help support circulation to the feet.

■ Packed in 1 litre dispenser bottles

■ Feed 10ml per day to horses (100 days supply) and 5ml to ponies (200 days supply)

Milk Thistle Liquid Herbal Tincture

A strong herbal extract to cleanse and support the liver. Milk Thistle is often recommended for liver support and cleansing, but its herbal power goes far beyond the health of the liver. Recent studies on milk thistle seed and extract indicate that this herb, used in traditional applications for at least the past two and a half millennia, has ingredients which can help levels of cholesterol, the kidneys and help flush heavy metals from the body.

■ Available in 1 litre bottles.

■ Fed at 15 ml pr day 1 litre will last for 66 days.

Milk Thistle Herb

This is the dried version of the herb.

Milk Thistle is a small prickly plant native to the Mediterranean region. The name comes from the milky fluid that leaks out when the leaves or stems are broken.

Add one slightly heaped measure (15grams) per day to the feed.

■ 1 kg will last 66 days.

■ Available in 1kg tub and also the 1kg Ecopacks

Mint

Aromatic mint encourages horses to eat. It has been used for centuries as a digestive aid.

■ Available in 500g, 1kg tubs and 5kg bags

Molasses

Used to improve the palatability of feedstuffs which make it an appetite stimulant, and also to suppress dust. It is a useful energy enhancer.

■ Packed in 4 litre and 5 litre containers

Muscle Toner

A natural feed supplement to promote healthy muscle development in horses. Containing Gamma Oryzanol and Creatine in a rice bran oil base for easy absorption into the gastro intestinal tract. It can help to provide increased stamina, lean muscle mass and a general improvement in overall appearance and well being.

■ Available in 1 litre bottles

Nettle

A natural herb for cleansing the blood.

■ Available in 1kg tubs and also 1kg Ecopacks

Soya Oil Virgin Source

Virgin Source Soya Oil is rich in linoleic acid to greatly improve skin quality and is also an excellent source of non-heating energy. This product should not be confused with some other soya oils which are highly refined, with consequent loss of some of the important characteristics.

■ Packed in 1 litre, 2.5 litre and 5 litre bottles

■ 1 litre will last 20–40 days

www.equimins.com

PERFORMANCE

➔ There are many reasons why a horse may be lethargic, lack performance or quickly tire so we have to look at exactly what the horse is expected to do and see what we can do to help.

Obviously, we have to make quite sure that the horse is fit and well. Good schooling and training should be taking place to build up muscle and stamina. Then we can start to look at what we can do for it nutritionally. If the horse is going to be doing some very strenuous exercise, then we have to provide the fuel for it to do so. There is no substitute for good nutrition and there are many products on the market that claim to provide the answer. In fact, for the average horse owner, making the right decision on what to buy must be mind blowing! So let us try and keep the job simple.

A horse is a simple, single stomached, fibre eating animal. This means that first and foremost we should be providing the best quality fibre we can afford, and then we should be topping it up with important minerals, vitamins and trace elements. We should always try to keep the hard feed to a minimum to avoid digestive upsets. Remember oil, (that means any oil) is two and half times higher in calorific value than cereals and horses can digest oil quite easily. It will supply a lot of energy, particularly something like our **Glow & Shine Omega Oil**.

Our **Diamond Omega** supplement is micronised ground linseed, containing a lot of oil in both Omega 3 and Omega 6 form and is a wonderful product to feed through the summer months as a good source of energy. It also provides essential vitamins and minerals for good health. We also have a choice of oils from **Cod Liver Oil**, **Soya Oil** and **Linseed Oil**.

Tip Top Equi-Red is a liquid iron based supplement supplying all important vitamins and minerals in a honey and a dextrose base for rapid absorption into the bloodstream. **Advance Concentrate Complete** and **Pro-Bio** are two more supplements that provide a superb array of nutrients to keep your horse looking great, and provide the correct nutrition to help energise your horse.

There are other specialist products we provide for releasing extra energy, namely **DMG, (Dimethyl Glycine)**, otherwise known as Vitamin B15 or Pangamic acid. It helps to increase oxygen uptake and therefore quicker recovery from strenuous exercise and is an excellent energy booster.

For the traveller going to events, we have **Energy B Booster** in an oral syringe to administer two hours before competing. **Per4mance Booster** is an easy to absorb instant energy shot, with added Ginseng to ensure the mind reacts as quick as the body. None of these products have any contra indications for competing so are quite safe to use. **Muscle Toner** is a fantastic product to quickly build muscle on a horse that has perhaps been neglected or just looking poor. It will quickly help build good solid muscle to help provide more stamina. **L-Carnitine** is a naturally occurring nutrient found in animals and plants. Horses gain **L-Carnitine** through the synthesis of amino acids. However they cannot quickly replace the extensive loss of **L-Carnitine** that occurs after strenuous exercise. **L-Carnitine** increases the ability of the muscles to utilise fatty acids, resulting in increased energy supplies. It is available in a 250ml bottle and larger sizes on request. For travelling horses, there is also **L-Carnitine Oral Paste Syringe**, available in a 30ml syringe for a quicker fix just before competing.

B-Plus Liquid

B VITAMIN SUPPLEMENT

Vitamins B1, B2, B6 and B12 in a liquid form. To help aid recovery after illness and to stimulate appetite.

Homogenised with dextrose and honey for rapid absorption into the blood stream. 1 litre will last the average horse 33 days and 4 litres will last 133 days. B vitamins can be used as a boost prior to strenuous activity and can also have a calming effect.

■ Packed in 1 litre and 4 litre bottles

DMG

(N,N Dimethyl Glycine HCl (Pure))

Dimethyl Glycine is otherwise known as Vitamin B15 or Pangamic Acid. It helps to increase oxygen uptake and therefore quicker recovery time from strenuous exercise. An energy booster, it is a form of the amino acid Glycine, and can help to reduce the muscle fatiguing effects of strenuous activity. It reduces the muscle fatiguing effects of strenuous activity.

This product will have benefits to any horses that are undergoing strenuous exercise, such as racing, eventing, showjumping etc.

■ Pack sizes 1kg

Dee-Tye & Drink

For the nutritional support of healthy muscle function. Contains minerals, body salts, D-alpha Tocopherol acetate (source of vitamin E), selenium, citric acid in a cherry flavoured liquid base.

This supplement will encourage your horse to drink more, essential to peak performance when doing strenuous exercise.

■ Available in 1 litre, 2.5 and 5 litre bottles

Energy B Booster

This is an oral B vitamin/mineral syringe paste for competing horses. Formulated to provide an extra energy boost, supplying important nutrients at times of strenuous activity

■ 30ml syringe

A friend uses Energy B Booster, I tried it at a show and it worked well.

K. STOCKS - LINC'S

Electrolyte Paste

ORAL SYRINGE

A balanced formulation of body salts and essential Calcium and trace elements in a convenient oral syringe. This is a high specification energy boosting formulation to compensate for loss of important body electrolytes lost in heavy strenuous exercise.

It will greatly assist recovery from exhaustion and fatigue.

■ 30 ml oral syringe.

Free from any banned substances as defined by the Jockey Club and the FEI

Tip Top Equi-Red Liquid Supplement

Homogenised with dextrose and honey for fast absorption into the blood stream, and a very high specification of vitamins, minerals and trace elements.

■ Available in 1 litre, 2.5 litre and 5 litre bottles

■ 5 litres will last 166 days. Excellent value for money

Glow & Shine Omega Oil

A blend of cold pressed oils all from natural vegetarian sources.

A valuable source of energy and Omega 3, 6 and 9. Oil is a much more digestible nutrient for the supply of energy for horses and is two and half times the calorific value of cereals. A horse is not a natural cereal eater and can digest oil easily. It provides a slow release of energy and is non heating.

High in Omega 3, helping to maintain joint integrity and good for the heart. Low in saturated fat. This product is the logical progression to more sustainable sources of Omega 3 than marine oils which are becoming more scarce. It is also a more natural way of feeding a horse than marine oils.

■ Available in 2.5 litre and 5 litre containers.

www.equimins.com

PERFORMANCE

FEATURE PRODUCT

ADVANCE CONCENTRATE COMPLETE

FEED AS NATURE INTENDED

We strongly believe that appreciating that horses are essentially a fibre eating animal, with a small stomach and delicate gut, is absolutely fundamental to ensuring good health. In its wild state, a horse would graze many acres of mixed pastures, forage in hedgerows for particular herbs and lick a little soil. That would be its daily diet. The problem today is that grazing is restricted and, like the hedgerows, does not contain a wide enough range of grasses plants. As a consequence of this, many owners have turned to formulated hard feeds, many of which are cereal based, something that would never occur in a horse's diet naturally.

It is the basic philosophy of **Advance Concentrate Complete** that most horses, unless doing lots of strenuous exercise, will manage very well on good quality fodder and then a top up of **Advance Concentrate Complete**. Furthermore, their gut will work much better, because it is not a natural eater of cereals, found in many feeds.

Advance Concentrate Complete contains everything else your horse could possibly need in the form of vitamins, minerals and trace elements. The minerals in **Advance Concentrate Complete** have been bound to an amino acid

source which then makes virtually all of the mineral digestible. This difference alone can make a huge improvement to muscle and coat condition as well as topline, and is completely unique to **Advance Concentrate Complete**.

It also contains a superb array of important probiotics and prebiotics, to greatly help support the immune system. A particular strain of *saccharomyces cerevisiae* yeast is included, which improves digestion of fibre in the hind gut tremendously.

We recognise that with some horses competing or doing lots of strenuous exercise, some extra energy providing food is necessary. Sugar beet which is a very good source of digestible fibre, is a good choice and the addition of some oil to the diet which will supply non heating energy. (Oil is 2.5 times the calorific value of cereals by the way!). Our cooked linseed is also an excellent accompaniment for horses in hard work **Advance Concentrate Complete** is highly concentrated. In fact, it is five times the strength of the standard product which means that you only give your horse a fifth of the amount. In other words a 4kg tub of **Advance Concentrate Complete** is the equivalent of a 20kg bag of Feed Balancer, and much easier to use.

Advance Concentrate Complete

For the first time, an important new source of bio available minerals have been used in an equine diet previously only available in human nutrition. **Advance Concentrate Complete** contains what can only be described as a truly superb combination of ingredients.

- Powder
 - 1.2kg, 2kg and 4kg tubs
 - 5kg and 10kg Bags
- Pellets are available in 2kg, 4kg and 10kg tubs

I have used Advance Concentrate Complete for some time, it is an excellent product.

ELAINE GLEN – GLENROTHES

I am using Advance on recommendation and a new three year old on it for three weeks, transforming her coat!

HELEN MORETON – GLOS

My horse is doing well on Advance Concentrate complete and Hoof Mender.

SARAH ROBERTS – SURREY

Advance Concentrate is a good product.

KIM DEWING – SUFFOLK

J. MACARTHUR –
AYLMERTON, NORFOLK

I am feeding three horses on Advance, Sox is the fittest and healthiest she has ever been, at 12 years old she has an energy and willingness never before seen. Today we galloped four miles and pulled up hardly blowing. The other two are also greatly improved.

I have to say I find your products fantastic. I have never had her looking so well in her coat, an amazing transformation in the last couple of weeks.

RITA DUNN

Per4mance Booster

The instant energy shot for eventers, hunters, racers and jumpers! A powerful blend of honey and glucose with ginseng extract.

- Available in 1, 2.5 and 5 litre jerrycans. 1 litre contains 20 x 50ml servings.
- 50ml may be administered 2-3 times a day if required.

L-Carnitine Liquid and Oral Syringe

This product is used in racing and events where strenuous exercise is the order of the day. L-Carnitine will help to release more energy during warm up, allows rapid recovery after hard work and helps to prevent exhaustion.

L-Carnitine is a natural amino acid and does not contain any banned substances. It is essential in the utilisation of fatty acids and in transporting metabolic energy. Each 10 ml contains 2g of pure L-Carnitine.

- Packed in 250ml and 1 litre measure bottles
- Feed up to 80ml per horse on the day of racing or any other strenuous activity
- 30ml syringe for easy administration
- Each 30ml contains 200mg of L-Carnitine

Revitalyte Electro Salts

A balanced formulation of essential body salts and probiotics. To be used after strenuous exercise, heavy sweat loss, travelling and conditions of stress to help replace and maintain important electrolyte salts. Can be dissolved in water or sprinkled onto feed.

- Available in 400g, 1kg and 4kg tubs
- 1kg will last 33 days

Muscle Toner

A natural feed supplement to promote healthy muscle development in horses. Containing Gamma Oryzanol and Creatine in a rice bran oil base for easy absorption into the gastro intestinal tract. It can help to provide increased stamina, lean muscle mass and a general improvement in overall appearance and well being.

- Available in 1 litre bottles

www.equimins.com

RESPIRATORY

You should always ensure that your horse is stabled where there is a good circulation of air all the time so that stale air with possible dust spore contamination does not build up.

Equimins produce **Air-Way Herbs** in dried herb and liquid tincture form to help the horses airways to stay clear.

Another product in the range is **Air Power Booster**, this is a soothing mixture with honey, menthol and eucalyptus.

Other products in the Equimins range include,

Garlic Powder, Granules or Garlic Extract Liquid can all help to keep the airways of your horse much clearer.

In stables that are prone to be contaminated with dusty hay, you can dilute **Microlat Stable Disinfectant** and use it with a fine sprayer to mist the stable air and so kill any pathogenic infection. To help keep the air in stables fresh at all times you should consider using **Stable Fresh**, a stable floor freshener and odour eater. It is a non-harmful, long lasting powder disinfectant that will help to get rid of ammonia smells from urine.

Air Power Booster

A mixture containing Honey, Apple Cider Vinegar, Aloe Vera, Menthol, Eucalyptus oil and concentrated lemon juice to soothe the respiratory tract. Administered orally with a syringe.

- Available in 500ml and 1 litre bottles

Air-Way Herbs

A blend of different herbs to help maintain clear airways. With Liquorice, Marshmallow, Aniseed, Garlic Flakes, Ginkgo, Coltsfoot, Plantain, Nettle, Golden Rod and Peppermint.

- 1kg will last 3-6 weeks depending on size of horse
- Available in 1kg tubs, 5kg bags and also 1kg Ecopacks

Air Power Booster. Heard about it from a friend, tried product, it works!

K. DAVIS, KNIGHTON.

Air-Way Liquid

A pure herbal liquid compound to help maintain clear airways. With Liquorice, Echinacea, Marshmallow, Coltsfoot, Garlic, Plantain and Clivers for lungs and airways. Average daily feed rate: 15ml per day.

- 1 litre bottle
- 1 litre will last 66 days

Clear Breather

A palatable equine supplement to support lung function. Contains MSM, a bio available source of sulphur important to lung tissue, Hesperadin, a natural bio-flavonoid and ascorbic acid.

- Available in 700g and 1.4kg tubs
- 1.4kg will last 50 days

Clear Breather is a quality product and good value.

D. PRICE - KENT

Garlic Granules

A matter of preference, some use granules rather than powder as the keeping qualities are a little better, although you should always replace the lid after use.

- Packed in 500g, 900g, 3kg and 5kg tubs, 10kg and 15kg Bags.
- Also available in 1kg and 3kg refill bags

Garlic Powder

Used traditionally for digestive and respiratory systems. Garlic is the ideal herb to use to support the body's natural defence system.

- Available in 500g, 1kg, 3kg, 5kg tubs, 10kg and 15kg Bags.
- Also available 1kg and 3kg Refill Bags

Respiratory Formula

A powerful herbal extract formulated to provide the best support for respiratory immunity and lung function. With Liquorice, Echinacea, Marshmallow, Coltsfoot, Garlic, Plantain, Clivers, Milk Thistle, Ginkgo, Feverfew, Quercetin, Yarrow, Chamomile, Eyebright, Rosehips, Nettle, Astragalus and Ginger, together with Eucalyptus Oil and Vitamin C.

- Horses 20ml per day
- Ponies 10-15ml per day
- Available in 1 litre bottles

EQUIMINS

www.equimins.com

VITS & MINS

➔ Nothing contributes so fundamentally to good health as having the correct and appropriate balance of good quality vitamins and minerals in your horse's diet.

That is why we produce a wide range of products. For those looking for maximum performance, **Advance Concentrate Complete** offers levels of nutrition that are quite simply unique. For those looking for something a little less potent, **Pro-Bio** is an excellent alternative, combining an

excellent range of vits and mins with generous levels of probiotics to help ensure a healthy and efficient gut. **Diamond Omega** combines vits and mins with ground, micronised linseed, making it an ideal summer supplement for those who want their horses to shine with health. **Tip Top** is also a good daily supplement.

Whatever type of horse you have, and however you use it, you can be sure we will have the ideal supplement.

Diamond Omega

GROUND MICRONISED LINSEED

Flax (Linseed) contains 56% Omega 3 and 16% Omega 6. It adds lustre to the coat and gives skin a smooth texture. It helps with the nutritional support of the joints and smoother muscle action. A normal acid balance in the muscles will be maintained along with removal of sand that may have accumulated in the gut.

This product is fortified with important vitamins and minerals, MSM and prebiotics.

■ Available in a 2kg tub, 2kg Ecopack, 5kg tub and 20kg bag

■ A 2kg tub will last the average horse 40 days

The ideal summer supplement

Have been using Diamond Omega since Aug '07. Really like this product, I compete in dressage and put my cob on Diamond Omega before he went to national championships last Sept, he's not looked back since. Going to winter champs next month and I have put my other two horses on it too! Great Product!

NINA DE LUCA - BUCKS

Tip Top Equi-Red Liquid Supplement

Homogenised with dextrose and honey for fast absorption into the blood stream, and a very high specification of vitamins, minerals and trace elements.

■ Available in 1 litre, 2.5 litre and 5 litre bottles

■ 1 litre will last 33 days and 5 litres will last 166 days. Excellent value for money

Glow and Shine

This is pure micronized ground linseed, a rich source of Omega 3 and Omega 6 oils. The ideal accompaniment to a full spec supplement or a feed balancer and as an alternative to linseed and other oil with the added advantage of all the fibre.

This product will put a wonderful shine on any horse.

■ Available in a 3kg Ecopack and 12kg bags

Glow & Shine Omega Oil

A blend of cold pressed oils all from natural vegetarian sources.

A valuable source of energy and Omega 3, 6 and 9. Oil is a much more digestible nutrient for the supply of energy for horses and is two and half times the calorific value of cereals. A horse is not a natural cereal eater and can digest oil easily. It provides a slow release of energy and is non heating.

High in Omega 3, helping to maintain joint integrity and good for the heart. Low in saturated fat. This product is the logical progression to more sustainable sources of Omega 3 than marine oils which are becoming more scarce. It is also a more natural way of feeding a horse than marine oils.

■ Available in 2.5 litre and 5 litre containers.

Pro-Bio Supplement

A broad spectrum vitamin and mineral supplement with generous levels of probiotics to help ensure a healthy and effective gut

■ Available in 1.5kg and 3kg tubs

■ 1.5kg will last 50 days

Seaweed

Pure dried sea kelp containing forty different minerals and trace elements to add lustre to the coat and improve hoof condition. Do not exceed the stated feeding rate.

■ Packed in 2kg and 4kg tubs, 2kg Ecopack and 10kg refill bags

Seaweed & Rosehip

Seaweed is very rich in over 40 different minerals and trace elements. Rosehips are rich in Vitamin C and A, B1, B2, B3, K and flavanoids. A good source of naturally occurring minerals and vitamins.

■ Available in 3kg tubs

■ 3kg will last 100 days

Vitamin E & Selenium Supplement

This supplement contains Vitamin E at 50,000 mg/kg and organic selenium at 25 mg/kg for horses in serious training. It is not to be confused with our Super Vitamin E supplement which also contains a full specification of all the other important vitamins, minerals and trace elements.

■ Packed in 1.5kg and 3kg tubs

■ 3kg will last the competition horse 30 days

Vitamin E, Selenium, Vitamin C, Lysine & Ginseng Liquid

We have been producing this product for France for some years now and it has increased in popularity in other countries too, so again, we are now making it available to the UK market. This product is a powerful aid to blocking the formation of free radicals. Ginseng provides extra vitality, so helps horses to increase their performance and to recover quickly after competition.

■ Packed in 1 litre and 5 litre bottles

■ Fed at 50ml per day 1 litre will last 20 days, 5 litres will last 100 days

Super Vitamin E & Selenium

A high specification equine supplement for eventers, formulated with higher levels of Vitamin E and Organic Selenium to help release energy. The U.K. has particularly low levels of selenium in the soil. With 50,000 iu/kg of Vitamin E, this supplement will help to ensure maximum protein metabolism.

■ Available in 500g, 1.5kg, 3kg tubs and 15kg bags

■ 3kg will last 38 days

Tip Top Supplement Powder

A very palatable all round equine supplement with an excellent specification. Thoroughly researched and formulated to help promote excellent health and condition. It will provide a very effective boost to the essential minerals and vitamins necessary to maintain good health and fitness.

■ Available in 3kg tubs, 15kg, 25kg bags and also a 2kg Ecopack

■ 3kg will last two months

Tip Top Supplement Pellets

The same analysis as supplement powder but in pellet form to allow easier use as a treat when little or no hard feed is given, particularly during the summer months. Recommended for all horses to make up the minerals and vitamins often lacking in the equine diet.

■ Available in 3kg tubs and 15kg bags

■ 3kg will last two months

Equimins Tip Top supplement is an excellent product.
K BLACKMORE - OXON

Tea Tree Shampoo

DOG AND CAT

A special formula shampoo with natural Tea Tree Oil.

■ 250ml bottle

Lavender shampoo

Lavender Shampoo – gentle yet effective.

A rich shampoo with natural essential oils of Lavender. It will leave your dog smelling like a breath of Spring, and with a super shiny coat.

Lavender can also assist in repelling annoying biting insects. Lavender is well known for its relaxing properties but can also help as a repellent for fleas and ticks."

■ 250ml bottle

Neem Shampoo

Neem shampoo is made using essential oil from the seeds of the Neem Tree that grows in India. A rich shampoo with natural essential oils of Neem.

Neem is widely used for numerous conditions and is highly respected for its versatility and effectiveness. Many Indian people sleep with some Neem leaves under their pillow, it is believed that this helps to repel mosquitoes.

Neem Shampoo will clean and revitalise your dog's coat whilst moisturising and protecting the skin.

■ 250ml bottle

Neem Spray

Neem spray is made from an extract of the Neem Tree.

Dogs can be sprayed with Neem spray just as humans spray themselves with insect repellent. Neem spray won't do any harm if it is licked off, because it is a vegetable extract and not an essential oil.

It is highly respected for its versatility and effectiveness. It is a natural gift from Nature that cannot be ignored."

■ 250ml bottle

Makes coats gleam!

www.bloomingpets.com

COUNTRY LIVING

➔ Keeping a few hens in the garden has never been more popular. It is environmentally friendly, gives great pleasure and has the added benefit of producing your breakfast egg every day!

However, like all livestock, they are not maintenance free, and we have produced a short range of products to help ensure they have a long, healthy and happy life. Our **Vital Vits+** product is a highly concentrated, very economical, broad spectrum, vits and mins supplement to go in their water. An ideal tonic during moulting, or for rescued

battery hens that need a little more in their diet. Likewise, **Egg Shell Improver** will help to ensure more robust eggs in birds that produce thin shelled eggs, as well as aiding skeletal growth. **Omega Oil** is also very beneficial, ensuring high levels of health giving omega 3, 6 and 9, not only for the hen, but also within the eggs.

For killing Red Mite and other insects we have the extremely popular **Dy-nomite**. It is a highly effective, natural and non toxic solution that works by puncturing the exoskeleton and dehydrating them.

Cider Apple Vinegar

A wholesome, unpasteurised, natural tonic to help maintain inner balance and promote good overall health in poultry.

Our Cider Apple Vinegar is unpasteurised and complete with the all-important "Mother". This is a gel like substance that contains a great many nutrients and important trace elements. It is not present in inferior products

■ Available in 1 litre, 2.5 litre and 5 litre containers

Dy-Nomite

A highly effective, natural and non toxic way to kill Red Mite. Based on Diatomaceous Earth, the directional nozzle makes it easy to get into all the hen house nooks and crannies where they live.

Treat regularly as part of your cleaning routine. Can also be used for lice on birds.

■ Available in 500g containers

Egg Shell Improver

A natural supplement that supplies Calcium and Phosphorus in the optimum ratio of 1.3:1 to support growth and strengthen and improve the quality of egg shells.

■ Available in 500g, 1kg and 1.5kg tubs

Garlic & Mint

A nutritious mix of mint and garlic granules to help ensure good appetite and a healthy gut.

■ Available in 500g tubs

Hen House Freshener

DRY DISINFECTANT

A safe, long lasting, powder disinfectant to help keep hen houses safe, clean and free from strong ammonia smells.

■ Available in 2kg tubs

Highest quality with 'The Mother'

Ideal for ex battery hens

Omega Oil

A rich blend of cold pressed oils high in essential Omega 3, 6 & 9 for healthy hens and eggs bursting with natural goodness

■ Available in 1 litre containers

Seaweed Small Animal Supplement

A pure and natural source of over 40 important minerals and trace elements to help keep hens healthy and in top condition

■ Available in 1kg tubs

Vital Vits+ Liquid Mineral Supplement

Concentrated vitamins, minerals and amino acids that can help food conversion in laying hens, increasing egg production.

For breeding stock it will also assist with egg fertility and hatching percentage. An ideal tonic for stressed birds, especially ex battery hens

■ Available in 250ml and 1 litre containers

Wound Spray

An effective disinfectant spray, with soothing Aloe Vera, for minor wounds and deterring further pecking of the area by other birds

■ Available in a 250ml spray bottle

THOROUGHBRED HERITAGE

Based in beautiful Devon, we are a family owned business with a rich heritage, and a very clear philosophy of producing the very highest specification products at the very best prices. For more than 30 years we have been manufacturing and supplying retailers with a superb range of equestrian supplements and care products, and it doesn't end there. We also offer a unique blend of services to help you deliver greater customer satisfaction, increasing both sales and profit.

FINEST INGREDIENTS

Great products start with great ingredients, and we scour the world for only the very best. Quality is never compromised, and it is definitely an area where experience counts.

PROUDLY MADE IN GREAT BRITAIN

To ensure the best ingredients are turned into the best products we manufacture everything at our facility in Devon, in line with our ISO9001 accreditation. An ongoing programme of research and development also helps keep us, and our customers, at the cutting edge of equine care.

SUPERB SPECIFICATIONS

We appreciate the unique bond of trust between horse and rider, and the responsibility that goes with it. It is one of the reasons why we are so open with our specifications. All products carry a full specification, and a product guide is available in every outlet, helping retailers and owners make better informed decisions.

COMPREHENSIVE PRODUCT RANGE

Our product portfolio is comprised of a comprehensive range that addresses all of the major areas associated with caring for the horse and rider.

Tasty Treats

The delicious treat your horse will love. Contains natural plant fibres, micronised cooked linseed, calcium carbonate, appetizing herbs and apple.

■ Available in 1kg resealable bags and 2.5kg Ecopacks

Feed your Horse as nature intended

To make the best possible use of its forage, **Advance Concentrate Complete** is the perfect solution to feed alongside a natural forage based diet.
